### Description

The Lew Electric PUFP ROUND COVER-GFCI series is a 6" round pop-up floor box cover designed to deliver safe, hidden power in a stylish, low-profile design. This integrated cover features a 15 AMP, tamper resistant, GFCI-protected receptacle that stays concealed when not in use. Simply pull the slide lever, and the top tilts open to reveal a fully functional power outlet — perfect for powering lamps, laptops, or electronics where wall outlets aren't accessible. This pop-up floor plate is scrub-water-tight when closed, making it ideal for kitchens, offices, living rooms, conference rooms, and other high-traffic areas where moisture protection is needed. It includes a quick connect port attached to the receptacle for fast and easy wire connections. The receptacle is UL listed for electrical safety (standard 943) and is a perfect choice for indoor residential or commercial applications in wood or concrete floors. For use in a subfloor application, the PUFP-WB wood floor box is required. For use in concrete, the PUFP-LRA leveling ring and FB round plastic floor box are required.

### Color Options

- Brass
- Stainless
