PUR2-WT-SF	784149700402

Description

The PUR Extended Flange series is designed to replace the standard flange in a PUR2, where a four inch hole has been cut in the countertop. The flange is designed for a new installation or when replacing an older style PUR that has been installed using a four inch hole size. This flange is designed to be used with either the standard PUR2 metal tops or wireless charging tops.

See the [Lew Electric website for a list](#) of part numbers that will work for each extended flange.
