Description

The Lew Electric UCB Under-Cabinet Power Box series is a sleek, metal, low-profile electrical box designed to keep your kitchen backsplash clean and modern by relocating power access underneath your cabinets. This under-cabinet power solution features a standard Decora-style opening, giving you the flexibility to install your preferred outlet, switch, USB charger, or smart device. Instead of cutting into your tile or stone backsplash to install wall plates and outlets, this discreet power box offers a hidden alternative that provides convenient access to power while maintaining a seamless kitchen design.
