Description

The Lew Electric 532-DA series is a round, deep, heavy-duty, die cast aluminum, concrete floor box with an attached metal tile ring. This fully adjustable floor box offers $\frac{9}{16}$ " of after pour adjustment. With a 4" deep design and 32 cubic inches of interior space, this floor box provides ample room for electrical wiring and devices. Each side of the box features a $\frac{3}{4}$ " threaded opening for convenient wiring access and it ships with a protective concrete cover that safeguards the box during the concrete pour, ensuring a clean, professional finish.

For tile or other flush hard surfaced applications, simply add a Lew 32 series round cover. For carpeted installations, in addition to the cover, pair the box with the optional SCF-1 carpet flange (sold separately), which adds $\frac{3}{8}$ " of height to account for carpet and padding.

Color Options

- Aluminum
- Brass

Compliance and Certifications

- ETL file #4004534
- Conforms to UL Standard 514A and CSA Standard C22.2 #18
