

1101-DA

Part numbers/UPC Codes

1101-DA 784149701133

Description

The Lew Electric 1101-DA is a deep, heavy-duty, die cast aluminum, concrete floor box designed for strength, reliability, and ease of installation. This single gang, fully adjustable floor box offers ½" of post pour adjustment. With a 3" deep design and offering 21.9 cubic inches of interior space, this floor box provides ample room for electrical wiring and devices. Each side of the box features a ¾" threaded opening for convenient wiring access and it ships with a protective concrete cover that safeguards the box during the concrete pour, ensuring a clean, professional finish.

A Lew Electric 1100-DBE Series tile frame (Brass: 1101-DBE-B OR Aluminum: 1101-DBE-A) is required for installation of this box and is sold separately. For carpeted installations, in addition to the tile frame, pair the box with the optional CF-1101-DFB Series carpet flange (Brass: CF-1101-DFB or Aluminum: CF-1101-DFB-A sold separately), which adds ⅜" of height to account for carpet and padding. To complete installation, an 1100 series cover is required.

Compliance and Certifications

- ETL file #4004534
- Conforms to UL Standard 514A and CSA Standard C22.2 #18
