1102-DA	784149701140
1103-DA	784149701157

Description

The Lew Electric 1100-DA Series is a deep, heavy-duty, die cast aluminum, concrete floor box designed for strength, reliability, and ease of installation. Designed in 1, 2 or 3 gang versions, these fully adjustable floor boxes offer ½" of post pour adjustment. With a 3" deep design, the 1100-DA Series floor boxes provide ample room for electrical wiring and devices. Each side of the box features a ¾" threaded opening for convenient wiring access and it ships with a protective concrete cover that safeguards the box during the concrete pour, ensuring a clean, professional finish.

A Lew Electric 1100-DBE Series tile frame (Brass or Aluminum finish) is required for installation of this box and is sold separately. For carpeted installations, in addition to the tile frame, pair the box with the optional CF-1100-DFB Series carpet flange (sold separately), which adds ¾" of height to account for carpet and padding. To complete installation, 1100 Series covers are required.

Compliance and Certifications

- ETL file #4004534
- Conforms to UL Standard 514A and CSA Standard C22.2 #18
